Figure 1: A schematic diagram of a 1D chain of N sites. The chain is represented by a horizontal line with N vertical segments. Sites are labeled A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z. The chain is divided into two parts by a vertical dashed line. The left part contains sites A through J, and the right part contains sites K through Z. The sites are connected by horizontal lines, and the chain is labeled N at the right end.

[illegible]

Figure 1 is a schematic representation of the experimental design. It shows two parallel sequences of events for two groups: 'E' (Experimental) and 'N' (Control). The 'E' group sequence is: 'E' (18) -> 'J' (20) -> 'N' (20) -> 'B' (20). The 'N' group sequence is: 'N' (20) -> 'J' (20) -> 'D' (20) -> 'N' (20). The 'J' and 'D' stages are marked with a downward arrow and the number '20'. The 'B' stage is marked with a downward arrow and the number '20'. The 'E' and 'N' stages are marked with a downward arrow and the number '18'.

1. *Chlorophyll a* and *Chlorophyll b* contents were determined by spectrophotometry using the method of Lichtenthaler and Whistler (1987).
