FOREWORD FROM OUR VICE-CHANCELLOR, PROFESSOR SASHA ROSENEIL

Building on our Sustainability Strengths

During my first year as the University of Sussex's Vice-Chancellor, I have been hugely impressed by the passionate commitment of our staff and students to addressing the profound environmental and societal issues facing our planet and its people. We know there is much still to do, but the enthusiasm and expertise to make real progress run broad and deep across Sussex.

The ambition set out in *Sustainable Sussex*, the University's Sustainability Strategy, is to establish Sussex as one of the most sustainable universities in the world. Our work on international development, global justice, human rights, and sustainability connects to be at the heart of this commitment.

Our Annual Sustainability and Sustainable Development Goals Report plays an integral role in this important work by compiling a summary of the progress that we are making against all 17 UN Sustainable Development Goals (SDGs). This is our fourth Annual Report and it covers every aspect of our environmental, economic, and social sustainability work, right across the University, including our teaching, research and innovation, policy development, external engagement and partnerships, and operational practice.

I am delighted that Sussex ranked 10th in the UK and 49th in the world out of 1,591 global higher education institutions in the *Times Higher Education Impact Rankings 2023* for our performance in relation to the UN SDGs. This strong standing is further bolstered by our ranking third in the UK for sustainable institutions and 55th in the world in the *QS Sustainability Rankings*, which were published in October 2022. We were also overjoyed to have retained our position, for the seventh consecutive year, as world number one for Development Studies, together with 15th on-campus partner institutions, and the Institute of Development Studies, in the 2024 *QS World University Rankings by Subject*. These rankings indicate that we are well on our way to achieving our ambition of being one of the most sustainable universities in the world.

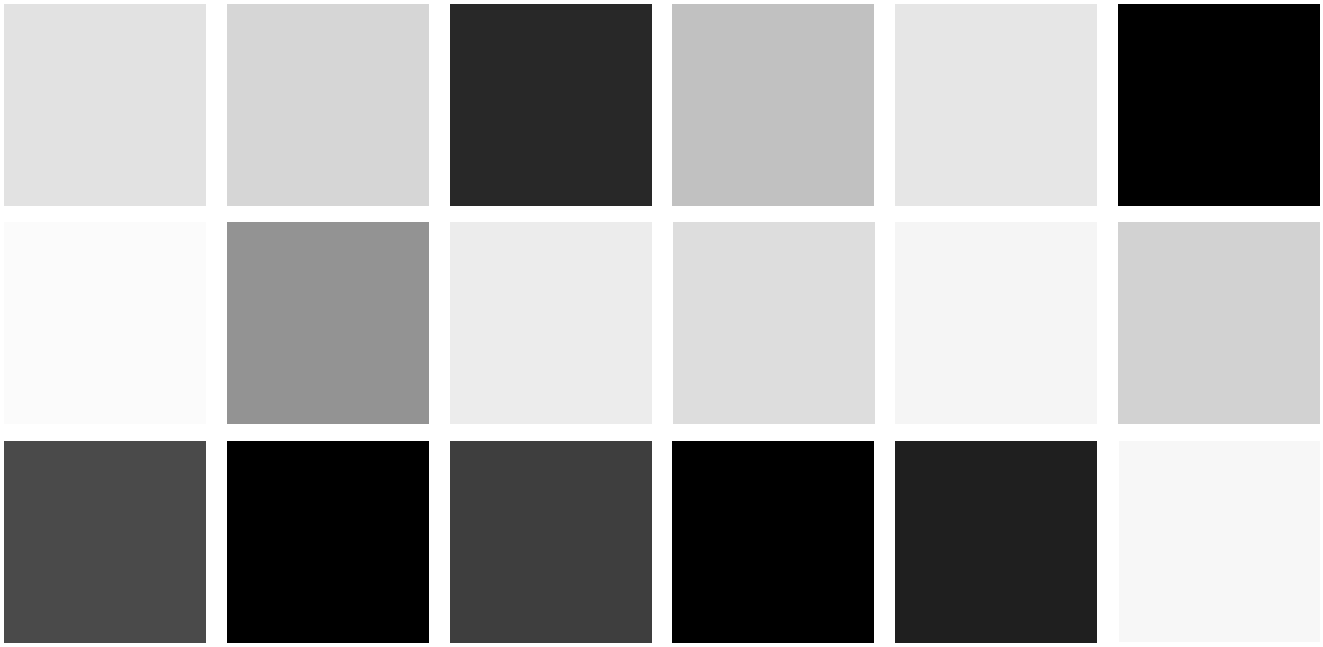
In early 2022, Sussex was invited to join the International Universities Climate Alliance, a group of 45 of the world's leading universities in tackling climate change. This is, in part, a recognition of the work of the Sussex Sustainability Research Programme, the University's Business School, the School of Global Studies, and the University's strong research output and real-world policy influence and outreach on sustainability. Sussex is also considered world-leading in energy, transition, and decarbonisation research, as employed by the Business School's Science Policy Research Unit (also called SPRU) which has been playing a key role in shaping global, national, regional, and local government energy policy development.

Igive some great applause to see how we have been building on our achievements during the past year, and introducing new initiatives. I would like to take this opportunity to highlight some, while encouraging you to read about them in more detail in the Report.

> We performed strongly in the newly added sustainability category in the *QS World University Rankings 2024*, with a score of 97.2 out of 100. We also came joint first, scoring 100%, in the area of Sustainable Food and Education for Sustainable Development in the 2022/23 *People & Planet University League*.

We were featured in the Campaign to Protect Rural England (CPRE) solar report in May 2023, as an example of how solar is being used to decarbonise energy in the education sector. This year we were awarded a 5 million Sustainability Programme grant to actively advance our campus decarbonisation plan and achieve our international commitments to being net zero by 2035.

We are tackling both the climate and cost-of-living crisis in an integrated way and have increased our financial support for students to help alleviate poverty through an increased Hardship Fund, the creation of a new affordable student housing policy and affordable housing scheme, and the introduction of a hugely popular, and much needed, low cost vegetarian and vegan 2 Serve Special meal option on campus. We also became accredited our first ever as a 'Real Living Wage' employer, and our academics have conducted further research with the Low Pay Commission to inform recommendations to the UK government on the national minimum wage.



SDG2 ZERO HUNGER

This SDG rela es o r orld-leading research on h nger, eaching on food s s ainabili y and r commi men o ackle food as e and address h nger among s den s and local comm ni ies.

OUR ACHIEVEMENTS

Thi year e cored 100%, coming join 1 in he area of S ainable Food, according o he 2022/23 *People & Planet University League*.[30]

We ha e a Re pon ible Food and Wa er Prod c on and Con mp on ec on in o r S ainabili S ra eg [31] and e re ie ed o r S ainable Food and Agric l re Polic hi year.[32]

We are par of a con or m of en UK n er i e and re earch in e na are helping o crea e f re leader in ainable food y em ia he Par ner hip for S ainable Food F re , Cen re for Doc oral Training (PSFF).[33]

We offer a Cen re for Doc oral Training (CDT) in Food S y em [34] and a hird year ndergrad a e mod le in Global Food Sec ri y[35] a ell a Global Poli c of Food.[36]

We offer a Ma er degree in Food and De elopmen [37] hich eache den abo food and n i on ec ri , ainable food y em al e chain and corpora e po er; and agri-food echnolog and i con e on .

We al o each an ndergrad a e mod le called he Fore Food Garden, enabling den o gro and ha e fore food on o r camp .[38] Thi i in addi on o he pro i ion of o r den garden, here den are pon ed o prod ce fr i and e ge able .[39]

We are creating opportunities for sustainable food and agriculture to
impact globally.pN globa9 0 9 5 y4S 455 BDC BT9 0 0 9 62.2372,68135 DC BT9 0GB)/MCIH183356.1eEhTEMC /P Lang (e96.1

SDG3 GOOD HEALTH AND WELLBEING

This SDG relates to our research on key diseases and conditions and support for healthcare professions, and the health of our students and staff.

OUR ACHIEVEMENTS

In 2021/22, approximately 14% of our UK-domiciled graduates gained an honours degree in a health profession including medicine and psychology, some of which were operated in partnership with the University of Brighton via Brighton and Sussex Medical School (BSMS). BSMS integrates teaching on sustainable healthcare and climate change into their undergraduate curriculum.[56]

In 2023, BSMS obtained an overall grade B+ in the Planetary Health Report Card,[57] a metric assessing medical schools' planetary health awareness and accountability. This positioned it third overall and first in the UK for research in sustainable healthcare in 2023.[58]

We collaborate with global, national and local health partners to improve health outcomes. The BSMS Sustainable Healthcare Group is at the forefront of sustainable healthcare.[59] The group is led by Professor Mahmood Bhutta whose work includes the clinical advisory board of Greener National Health Service (NHS), also focusing on better working conditions in healthcare supply chains.[60]

In 2023, BSMS conducted a carbon footprint of products used in the three most common surgical operations carried out in the National Health Service (NHS) in England.[61] In support of NHS Net Zero targets and initiatives, they were commissioned by the UK Health Alliance on Climate Change to produce a landmark Green Surgery Report due for release in November 2023.[62]

We hosted the annual Sustainable Healthcare Academic Research Enterprise Conference; a global event for healthcare professionals to share best practice on sustainability.[63]

Our re-elected Global Health and Infection Department (GHI) has members in various locations, including University Hospital Sussex NHS Foundation Trust and multiple other areas in addition to advising the World Health Organization (WHO) on mental health, stigma and Neglected Tropical Diseases (NTDs).[64] In January 2023, GHI members co-organised a week-long exhibition at the UK Parliament to highlight the need for further investment in tackling NTDs.[65]

We lead community outreach programmes to improve and promote health and wellbeing. For example, since 2015 our Time for Dementia initiative has been supporting people with dementia and their carers.[66] We also run a Time for Arts programme.[67] Meanwhile, our Living Well with HIV project engaged HIV patients, healthcare providers and related stakeholders in a coalition to improve access to commissioned mental health services and quality of life for people living with HIV within Kent, Surrey, and Sussex.[68]

We have a widening participation scheme called Brighton&Med[69] that undertakes outreach to local schools to help increase the number of medical students from under-represented groups. It has been nominated for and won numerous awards since its inception, including being shortlisted in 2021 for the *Times Higher Education* (*THE*) Widening Participation or Outreach Initiative of the Year Award.[70]

We share our portfacilities with the local community, including access to complementary therapies[71] and our portering team, Sussex portering work closely with Albion in the Community, local schools and disability groups to promote portering in the community.[72] We offer free matches to the VYD youth project to support disadvantaged groups including refugees.[73]

We protect the mental health of our staff via an Employee Assistance Programme and the Spectrum.Life app, providing in-depth tools and support to improve mental wellbeing.[74]

Our students can access a fully integrated counselling and wellbeing service and disability unit.[75]

We also provide a GP[76] and pharmacy service,[77] as well a

SDG4 QUALITY EDUCATION

This SDG rela es o r con ri ion o early years and lifelong learning, r pedagogy research and r commi men o inc si e ed ca ion.

OUR ACHIEVEMENTS

Thi year e cored 100%, coming join 1 in he area of Ed ca on for S ainable De elopmen according o he 2022/23 *People & Planet University League*.[82]
