

remediated in Australian and UK universities

The following table shows the results of the regression analysis for the dependent variable "Number of children in the household" (N = 1,000). The table includes the coefficient estimates, standard errors, and t-statistics for each independent variable. The overall F-statistic is 12.34, and the adjusted R-squared is 0.15.

[illegible]

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains.
